## Risk Management

**November 17, 2010, InterContinental Hotel**

The Risk Management event will focus on identifying and assessing the main business risks that companies active in Romania are facing as well as on mapping out potential solutions and systems to manage those risks, be they market risks, credit risks or operational risks. The event will also provide insights on ways to select cost-effective risk-management solutions and finding the appropriate methods to plan and implement risk management solutions.

Legal risk assessment is an important step in protecting your business, your employees, as well as complying with the law. For most, that means simple, cheap and effective measures to ensure your business is protected.

The law does not expect you to eliminate the risk, but you are required to comply with the law. Failure to do so, triggers monetary fines, suspension of activity, costly litigation. Our workshop "Compliance Matters" tells you how to achieve that with a minimum of fuss.

We will try to answer to the questions such as What does "legal risk management" mean to management in today's companies? Or What should be done to manage the legal risk in today's situation?
